* The source availability codes are the same as last year's. The following definitions still apply:

Active Source (Formerly: Permanent, Backup, Seasonal, Provisional, Interim) means an approved source(s), monitored and maintained to meet 310 CMR 22.00 and used for primary or backup purposes to meet consumer demand as necessary.

Inactive Source (Other, contaminated) means an approved source(s), which is expected to be off-line for at least one year (12 months). A source may be deemed inactive only upon written approval of the Department. An inactive source may not return to active status without written approval from the Department.

Emergency Source (No change from previous) means any source of water used to supplement or temporarily replace a public water system's active or inactive source(s) when water of sufficient quality or quantity is not available. An emergency source may be placed on-line only after the Department's approval pursuant to a declaration of a state of water emergency under M.G.L. c. 1G § 15-17 or as a requirement of a Department administrative order.

Abandoned Source (Formerly: Other) means a source that is physically disconnected from a public water system and is no longer maintained as an active, inactive, or emergency source. Abandoned source(s) cannot be used as a public water supply source. A source may only be abandoned pursuant to 310 CMR 22.25.

** Total number of days that a source was used during the year.
